## Common ICD-9-CM Sign And Symptom Codes

Listed below are the ICD-9-CM codes commonly received by Dynacare. Code descriptions were taken from the official code set, issued by the US Department of Health and Human Services, **effective October 1, 2009 through September 30, 2010**. Please refer to an ICD-9-CM manual for a complete listing. The ordering physician must always determine, for the specific date of service, the appropriate diagnosis code(s) based on the patient's signs and symptoms. ICD-9-CM codes are required by third-party payors to confirm the medical necessity of the test(s) and/or profile(s) ordered. Physicians are asked to submit all medically appropriate ICD-9-CM codes when ordering laboratory testing.

Dynacare's provision of this information as a customer service does not suggest and is not meant to suggest that any of these codes should or should not be used on any given occasion. Dynacare makes no recommendation regarding the use of any particular diagnosis code(s).
